

RISHIKESH MUDALIYAR

WEB DEVELOPER

SUMMARY

"A self-driven Second-year engineering student exploring the world of frontend development. I've built multiple small-scale projects using HTML, CSS, and JavaScript, and I'm working on improving my UI/UX sense and project depth. I believe in learning by building and am excited to participate in hackathons, collaborate with peers, and continue growing as a developer."

PROJECTS

1. Serenote – Digital Journaling Application

Tech: HTML, CSS, JavaScript

Collaborated with a team to build an intuitive digital journaling platform that supports both voice and text entries. Contributed to UI/UX design, frontend development, and feature planning. The app includes mood tracking, a mini digital garden, and smooth user interaction flows. Focused on creating a calming, accessible journaling experience with clean visual design and meaningful features.

2. Need2Tool – AI Tool Generator

Tech: Node.js, Express, Together AI (Mixtral), HTML, CSS, JS

Developed an AI-powered web tool during a 48-hour solo hackathon that generates full frontend code based on user prompts. Built a Node.js backend for prompt-based code creation and project idea suggestions. Designed a clean, responsive UI with features like theme toggle to improve usability. Focused on boosting developer productivity through rapid code scaffolding.

3. The B-Proj – Frontend Practice Collection

Tech: HTML, CSS (JavaScript planned)

A growing personal repository of mini frontend projects created to strengthen layout building, responsive design, and UI structure. Includes multiple practice builds such as a shopping cart layout, VS Code clone, and UltraEdit homepage. Some projects are experimental, reflecting continuous learning and hands-on exploration of modern web design patterns.

EDUCATION

BACHELOR OF ENGINEERING
SIES Graduate School of Technology
2024 - 2028

HSC – SCIENCE
Intigrated
2022 - 2024

SSC
South Indian Association School & Junior
College

SKILLS

Web Design
Design Thinking
Wireframe Creation
Front End Coding
Problem-Solving
Computer Literacy
Project Management Tools
